

# Edvin Perfundi

## Software Developer

### Work Experience

06/2025 - ongoing

#### HOPn - Munich, Germany (Remote)

##### Frontend Developer Intern

- Built the client-side using JavaScript, React, and Tailwind CSS of a real-world commercial application, which is going to be released in Germany.
- Coordinated frontend tasks with another front-end developer intern.
- Collaborated closely with a UI/UX Designer to refine the interface and improve user experience.
- Communicated with the backend developer to define and refine API requests and responses.
- Worked alongside a QA engineer to identify and resolve bugs and other issues.

05/2025 - 07/2025

#### Software Business Srl Benefit - Tirana, Albania

##### Fullstack Developer Intern

- Implemented a simple client-server architecture using gRPC in Python
- Resolved issues in AI-generated code and fixed bugs in a project that used an Express server to execute Python scripts for a battery setup machine.
- Analyzed the codebase to remove unused Node.js dependencies and improve server performance.
