Languages

English - C1

German - B1

Albanian - Native

Skills

- Python, SQL, JavaScript
- Jupyter Notebook, Git & GitHub
- NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, PyTorch.
- Data cleaning, Exploratory data analysis (EDA), Model evaluation, Feature Engineering.
- Business Analytics, Econometric modeling, Financial Analysis
- Web Scraping
- Problem Solving

Work Experience

06/2025 - 12/2025

HOPn - Munich, Germany (Remote)

Frontend Developer Intern

- Built the client-side using React, of a real-world commercial application, which is going to be released in Germany.
- Collaborated closely with a UI/UX Designer, a backend developer and a QA engineer

05/2025 - 07/2025

Software Business Srl Benefit - Tirana, Albania

Fullstack Developer Intern

- Developed and tested a client-server architecture in Python using gRPC, focusing on efficient data communication and serialization.
- Refactored Python code to ensure cleaner dependencies, reducing redundancy and improving performance in data processing pipelines.

03/2025 - 05/2025

division5 - Tirana, Albania

3d Web Developer Intern

- Developed interactive 3D web experiences using Babylon.js, allowing users to visualize and interact with dynamic 3D models in real-time.

Education

10/2025 - ongoing

Free University of Berlin

Masters in Data Science

10/2022 - 06/2025

University of Tirana

Bachelor in Business Informatics

Projects

11/2025 - 03/2026

Predicting rent prices in Berlin

[Project link](#)

- Wrote a python script to scrape rent listings in Berlin.
- Cleaned a dataset of 22600 samples.
- Conducted EDA to detect outliers and invalid samples.
- Transformed and encoded complex categorical and structured variables to improve model interpretability and predictive power.
- Implemented and compared multiple models with optimized hyperparameters using cross-validation.
- Improved model performance from R squared 0.66 to R squared 0.93.
- Interpreted model outputs using SHAP values.

Honours and Awards

Scholarship

Software Business Branch Albania Shpk
