PROFILE

Data Science student passionate about building models and analyzing datasets to uncover hidden patterns and actionable insights. With a background in frontend development and finance, I bring a sharp eye for detail in dashboards and data visualization, ensuring insights are both accurate and easy to understand, alongside solid domain knowledge in finance. I am committed to further developing my skills in predictive modeling and data analysis, preferably within FinTech companies.

EDUCATION

Master of Science in Data Science

Oct 2025 – Current

Freie Universität Berlin, Berlin - Grade: 1.4

- Relevant coursework: Advanced Machine Learning, Advanced Statistics, Databases, Data Analytics and Data Visualization, Time Series Analysis, Data Integration and Large-Scale Analysis.

Bachelor of Science in Business Informatics

Oct 2022 – Jun 2025

University of Tirana, Tirana - Grade: 1.1

- Relevant coursework: Algorithms, Data Structures, Databases, Networking, Management of Information Systems, Web Programming, Econometrics, Statistics, Accounting, Financial Management.
- Awarded a full public scholarship for the entire duration of study, granted to students with high grades, plus an additional private scholarship in the final semester for top-performing students.

PROJECTS

Predicting Rent Prices in Berlin

- Built a full end-to-end ML pipeline predicting Berlin apartment rents, deployed as a live, interactive web app.
- Scraped ~22,700 listings from Immowelt (respecting robots.txt and rate limits) and cleaned them into a modeling-ready dataset of ~15,600 listings across 29 raw features.
- Engineered and encoded features (one-hot encoding, standard scaling) and ran systematic feature-ablation experiments to remove noisy predictors.
- Trained and benchmarked six regression models (Linear Regression, KNN, SVR, Random Forest, XGBoost, Neural Network) using 5-fold cross-validation and grid-search tuning.
- Selected Random Forest as the final model ($R^2 = 0.92$, $RMSE \approx \text{€}205$) for its built-in uncertainty estimate, tree disagreement correlated 0.54 with prediction error, letting the app show users a confidence level instead of a single number.
- Explained predictions using SHAP values, feature importance, and partial dependence plots, identifying apartment size, room count and district as the strongest price drivers.

WORK EXPERIENCE

Frontend Developer Intern

Sep 2025 – Feb 2026

HOPn, Munich

- Worked as a React developer on a real-world commercial application set for release in Germany.
- Participated in regular planning and problem-solving discussions via Google Meet.
- Collaborated closely with a UI/UX designer to improve interface and user experience.
- Coordinated with the backend developer to define and refine API requests and responses.
- Worked alongside a QA engineer to identify and resolve bugs and other issues.
- Managed tasks using Linear and used GitLab for version control.
- Resolved merge conflicts, particularly when multiple developers worked on overlapping files.

Python Developer Intern

Jun 2025 – Aug 2025

Software Business Srl Benefit, Tirana

- Implemented a simple client-server architecture in Python and containerized it using Docker.
- Debugged and improved AI-generated Express.js server code executing Python scripts for a battery system.
- Analyzed and refactored the Node.js codebase, removing unused dependencies to improve maintainability and performance.
- Implemented and improved existing features per client requests.

3D Web Developer Intern

Mar 2025 – May 2025

division5, Tirana

- Researched technologies for text-to-speech and for mapping speech to 3D character animations.
- Developed an interactive 3D web application using Babylon.js and Express.js, enabling users to generate speaking 3D character models from text input.

SKILLS

Programming	Python · JavaScript · SQL
ML & Data	Scikit-learn · PyTorch · Pandas · NumPy · Feature Engineering · Time Series Analysis · A/B Testing · Streamlit
Data Engineering & Cloud	Cloud Computing · ETL & Data Warehousing · Distributed Data Storage & Processing · SQL/OLAP
Tools	Git · Docker
Domain	Financial Management · Business Analytics

LANGUAGES

English — C1
German — B2
